## **Oscillatory/Vibratory Tandem Rollers**

SW774 & 774ND

High frequency vibratory asphalt rollers are literally the fastest rollers available, featuring a high frequency of over 4,000 vpm. Designed to beat the tender zone on superpave and other perpetual pavement mixes.

#### **Best Compaction Quality and Efficiency**

- Frequency and amplitude modes can be switched from the seat
- Cross-mounted drive and vibration motors help maintain even weight distribution
- Counter rotation of eccentric weights in the drums cancel horizontal force
- Timer, auto or constant operated water spray system
- Osc achieves density on no-vibe jobs where structural integrity is of concern.

#### **Operator Comfort**

- Multi-position operator station (MPOS) (5 positions)
- 180° easy rotating operator console
- Excellent drum edge visibility from the operator seat

#### **High Safety Standard**

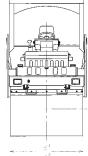

- Sakai proprietary emergency brake pedal which kills the engine and stops the machine instantly.
- 3 inch retractable seat belt
- 39 inches of visibility to the front and rear from the operators seat
- SAHR (spring applied hydraulic released) brake

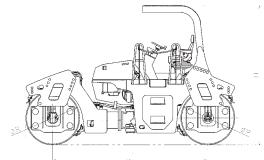

#### **Easy Maintenance**

- Sprinkler system with plastic water tanks, triple-filtration, removable brass nozzles for ease of maintenance with excellent draining winterization
- Easy ground level access to all check and maintenance points
- Long life drum isolators
- Gear drive Osc/Vibe system (no belts)
