REMOTE CONTROLLED SLOPE MOWER

SPECIFICATIONS LV400 PRO

Engine	Yanmar 26.9 Kw
Horsepower	36HP
Torque	103Nm
Fuel type	Diesel
Fuel capacity (L)	21
Ground speed (Km/hr)	9
Standard Flail Weight	200kg
Machine Weight only	875kg
Flail Speed	3000 rpm
Machine Height	1110mm
Machine Length	1860mm
Machine Width	1170-1570mm
Main attachment pump	(piston closed loop) 58.8 lt/min @250bar
Service pump	24 lt/min @ 180bar
Extendable undercarriage	(Closed) 1170 mm (Open) 1570 mm
Attachment sideshifting	(Hydraulic) 400 mm + (Mechanical) 400 mm
Attachments	Pallet Forks Stump Grinder Sprayer Grapple Loader Bucket

FEATURES

Powerful 3-cylinder YANMAR DIESEL ENGINE	Patented undercarriage to climb steep slopes and anti-de-tracking system of the tracks.
Engine lubrication patented by MDB for continuous use on steep slopes of up to 60°.	The reversible fan and an oversized radiator allow for continuous work at full power also at high outside temperatures.
The integrated hydraulic side-shifting plate allows for lateral adjustment of the attachment of up to 400mm.	Onboard compartment with charger for the remote control.
Integrated cylinders allow for widening of the tracks from 1170mm up to 1570mm (patented system).	The totally hydraulic floating attachment plate of the mulcher allows the tool to remain constantly in contact with the floor.
